

Sabrina Rahman Mazumder

House-57, Road-13, Block-E, Banani, Dhaka-1213

Mobile: +88(0)17886211777

Email: sabrinarahmanmazumder@gmail.com

Education:

2020 – 2025 BSc in Computer Science & Engineering

BRAC University, Dhaka

2017 – 2019 Higher Secondary School Certificate (H.S.C)

(Equivalent to A-Levels)

Shaheed Anwar Girls School & College, Dhaka

2007 – 2017 Secondary School Certificate (S.S.C)

(Equivalent to O-levels)

Shaheed Anwar Girls School & College, Dhaka

Bangladesh

Work Experience:

2025 Working on CVIS LAB under Dr. Md. Ashraful Alam

STM32 microcontroller

BRAC University

Dhaka, Bangladesh

CGPA:3.61

2023 - 2024 Teaching Assistant/Student Tutor

BRAC University

Dhaka, Bangladesh

Key Responsibilities: Helping students regularly on their classes, starting from the beginning of semester to the end of semester. Apart from this my other key role was to check the exam copies to help the lecturer.

Other Work Experience

2020 – 2021 Covid Volunteer

Dhaka, Bangladesh

Key Responsibilities: Me and few of my friends planned to help underprivileged people during COVID 19. My key role was to monitor that all women and children in my territory (Korail Slum) are getting the benefit of basic health guidance. Once in a week my responsibility was to arrange a daylong session to ensure that everyone is safe, wearing face mask and if anyone is covid positive then that person is not in danger and maintaining isolation.

Skills:

Python, JavaScript, STM32, Microcontroller, Assembly Language, Quartus II, VLSI Design.

Achievements:

Mooting: During my H.S.C I competed in National Mooting Competition which was organized by Dhaka University in Bangladesh.

Debating: I represented my school and college few times in Inter-school and college Debate competitions. Also, I have participated in General Knowledge Competitions to represent my school.

Communication: I am competent in oral presentation as I have to deliver many speeches in my course presentation. This has enhanced my oral communication more confidently.

Language:

English, Bangla, Hindi

Interests:

Sports: I am passionate about indoor games. I received several awards in school, college and university for many indoor games like chess, cards, board games.

Cooking: I love to cook different cuisines which are healthy, tasty and affordable.

- Thesis: Advanced Noise Reduction and Feature Enhancement in Medical CT Brain Imaging using Deep Learning – Developed a novel Attn-GAN model integrating ESRRGAN with Multi-Head Self-Attention and a PatchGAN discriminator. Introduced synthetic LDCT generation using autoencoder-based noise injection to overcome data scarcity. The framework enhances CT scan clarity, reduces artifacts, and improves subtle clinical features, helping doctors make more accurate diagnoses with lower-radiation scans.

- Project: Semi-Outdoor Climate Control System – Designed an Arduino-based IoT system combining automated cooling and humidification with DHT11 sensors, relays, and misting fans. The system adapts dynamically to environmental conditions, making it low-cost, modular, and suitable for both indoor and outdoor use. Future scalability with solar power and ionizers strengthens its uniqueness, providing sustainable comfort and energy efficiency in crowded urban settings and resource-limited rural areas.
